

# The Quality of Our Paint Line

## Why Englert Quality Sets the Bar

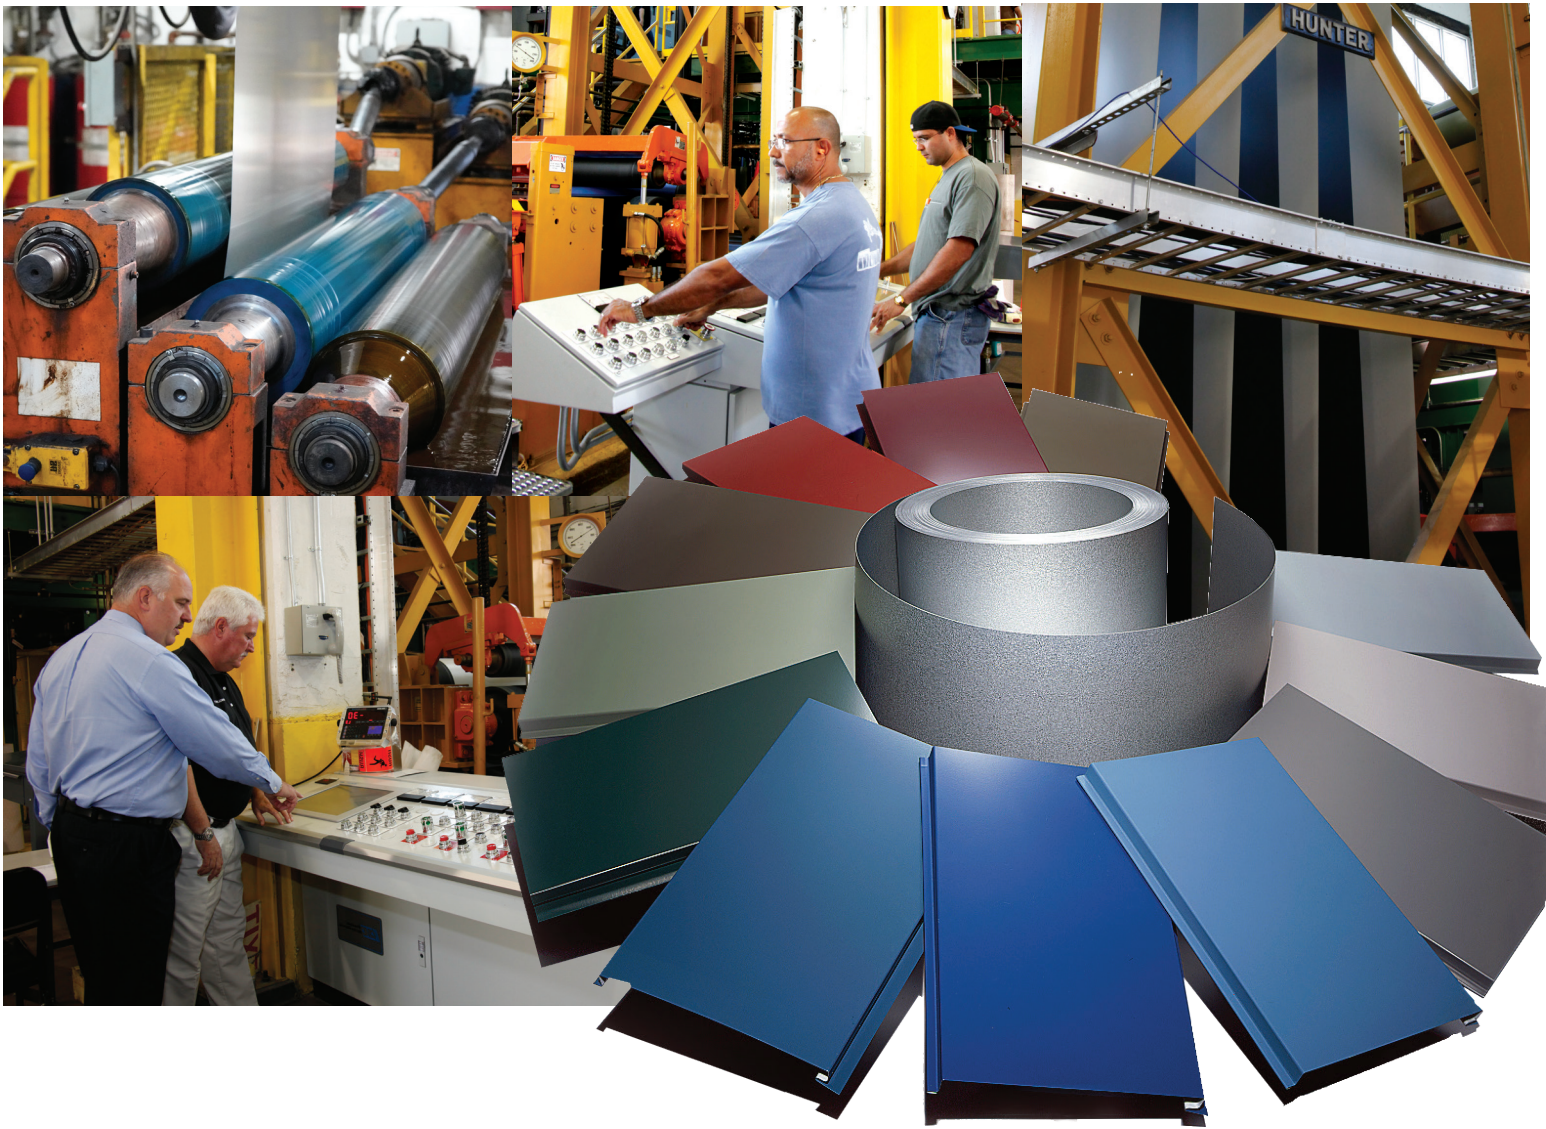

Over the years, many of our clients have complimented Englert on the quality of our paint finish and our ability to offer small and custom runs for roofing and gutters. So many people think there is a mystery, so we have decided to let you know our secret:

1. Top-quality materials, including Kynar 500 paint, formulated specifically for our paint line
2. Adherence to a quality checklist for testing and quality control. Each coil can receive up to 20 tests for quality assurance.
3. Our master craftsman approach to training – we trust your product to the industry’s most experienced paint line staff.
  - a. Our average paint line specialist has over 15 years of experience on our line.
  - b. Our Quality Manager has been in the business since 1987
4. Our coils have four coats of paint to make the finish more durable.
5. Random painted samples are pulled for accelerated testing. These involve: Salt spray (ASTM B117) Proheasion (ASTM G85 Annex 5) and QCT (ASTM D4585). All accelerated tests are done for 1,000 hours.

It takes years for a paint line worker to produce quality painted coil. One way to gauge the quality of roofing and gutters is to determine the tenure and training process for the line workers.

We would love to give you a tour of the line. Please call Englert anytime at 800-364-5378.

Englert partners with PPG Paints for our paint line. PPG is a leader in the paint industry and works with us to empower successful outcomes for every project, every time. PPG coil coatings have been recognized for durability in architectural metal coatings for more than 50 years. The coatings are engineered to withstand the most rigorous residential, commercial, and industrial settings and certain severe environmental conditions. With exceptional coil coatings, a large color library, color capabilities, and special effect finishes, PPG is the perfect partner for our architectural metal. Englert is proud to work with PPG to ensure our paint finishes are the highest quality so our customers have the finest materials for their projects.
