

NOBODY MAKES MORE OUT OF METAL

For nearly 40 years, Englert has been earning a reputation as The Metal Experts. One look at our broad line of Englert products and you'll understand why. Our custom-designed standing seam commercial and residential metal roofs are unparalleled in the industry. Our state-of-the-art rollforming machines reduce costs while increasing efficiency. When you partner with Englert, you're working with a company committed to helping you achieve on-the-job perfection. Every time.

Once you realize what separates Englert from the competition, you'll understand that for your complete metal roofing solutions, there's only one choice. Nobody helps you make more out of metal than Englert.

ENGLERT™

OUR TOTAL PROGRAM HELPS YOU
MAKE MORE OUT OF METAL

AN IRONCLAD COMMITMENT TO SERVICE AND SUPPORT

At Englert, we stand behind our products and machines. *We also stand behind our partners.* That's why you can rely on us for the industry's most comprehensive level of training, service and support. Simply put: Our warranties and training programs are the best in the business.

"Best-in-Class" Warranties

ENGLERT WARRANTIES INCLUDE:

- 20- to 35-year paint warranties on all our roofing products.
- Availability of up to 20-year weather-tightness warranties.
- "Single-Source" warranties available for stress-free coverage with one phone call.
- 1-year parts and labor warranties on all our rollforming machines.

If you purchase an Englert machine for your business, you can rely on the fact that it will be serviced by an Englert mechanic, even if it means traveling to your job site.

Only Englert makes that commitment.

And no job is too small. Because your smallest jobs deserve the best...so they can turn into big jobs. That's why Englert provides custom colors on small orders. It's just another way we're able to help our partners effectively grow their business.

A commitment to our partners

LET OUR STAFF BECOME AN EXTENSION OF YOUR TEAM *Nobody offers more support*

When you partner with Englert for your metal roofing contracts, you get more than just the finest materials. **You get your own world-class metal roofing company that serves as an extension of your team.** Nobody has a more comprehensive program for contractors than Englert. From manufacturing and engineering through installation – and every step along the way – Englert provides you with the design, technical and manufacturing support you need to ensure total customer satisfaction.

With all of our resources at your disposal, you can provide your clients with a level of service most roofing contractors simply can't afford. Englert has taken thousands of contractors' business to the next level. Let us do the same for you.

THE ENGLERT PROGRAM ADVANTAGE:

- Training on installation and manufacturing.
- On-staff engineering technical support.
- Product listings with the following agencies: UL, FM, Miami Dade, Florida Building Code, ICC.
- Site-specific wind-load engineering available to ASCE-7 standards.
- Additional job-specific calculations and engineering available.

EVERYTHING YOU NEED, UNDER ONE ROOF

Englert is your single-source provider, from our innovative in-house continuous coil coating line, to our state-of-the-art rollforming machines, to our testing capabilities, and in-house engineering expertise. Englert even provides the engineering assistance required to meet special conditions, consulting with you every step of the way.

Single-source provider

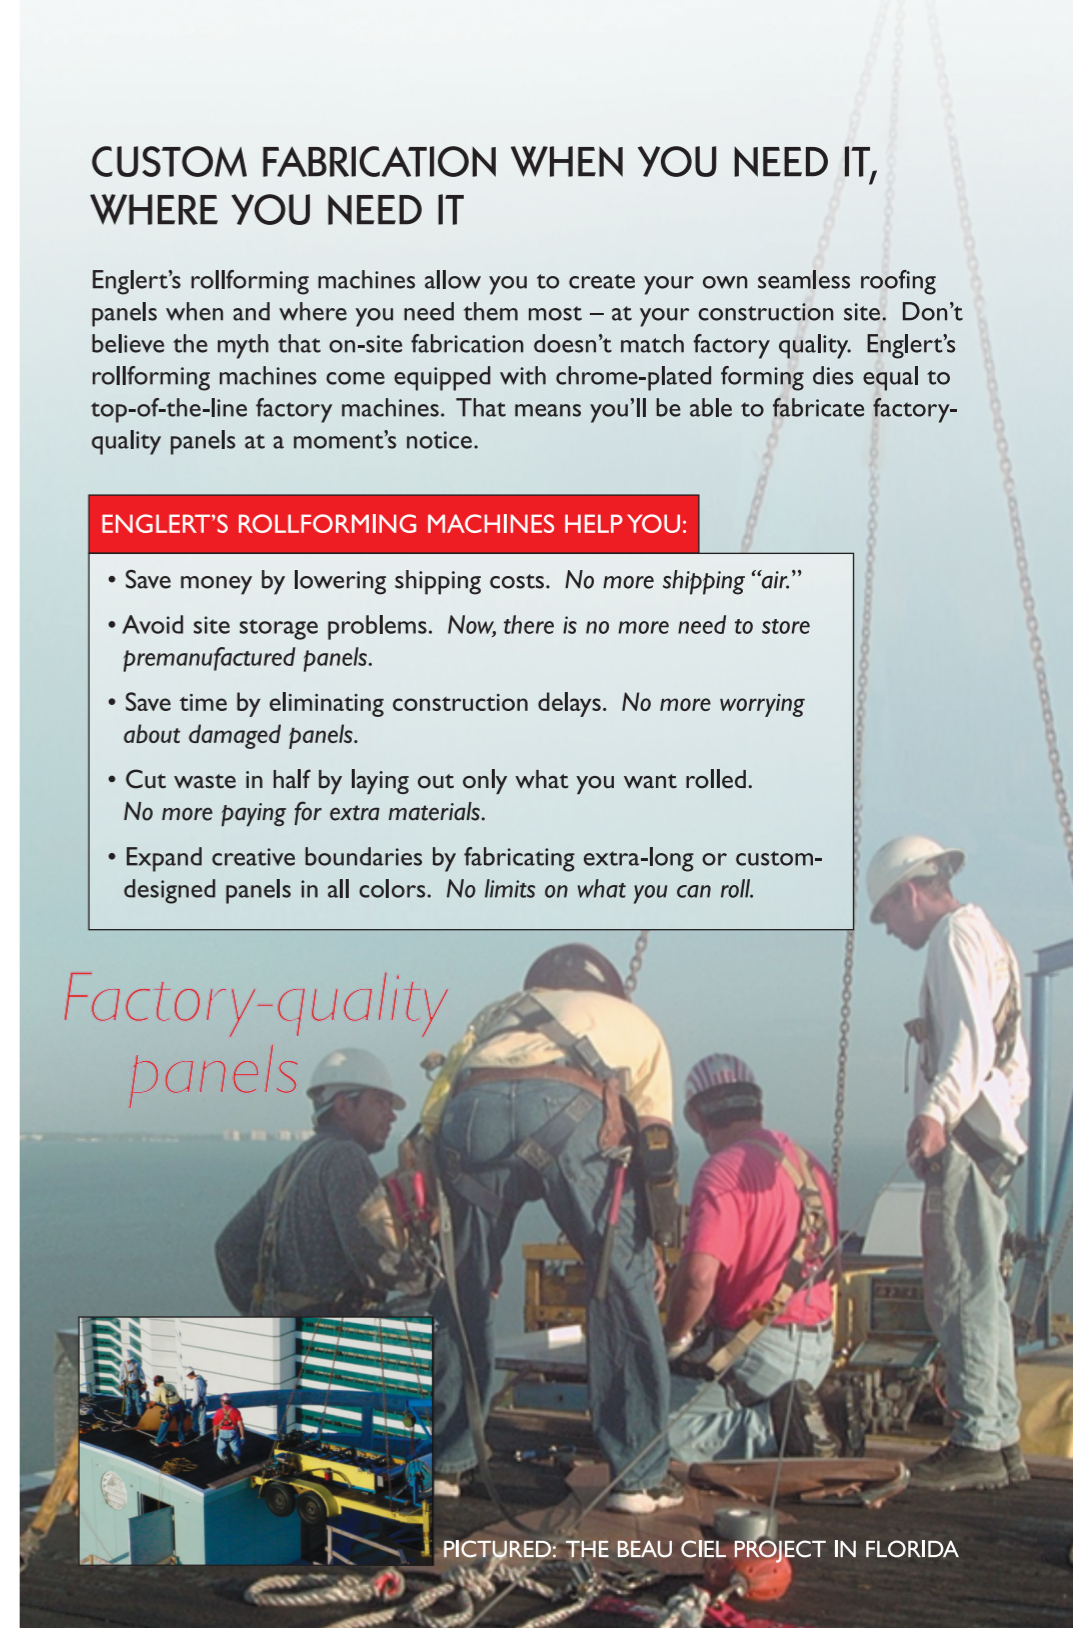

CUSTOM FABRICATION WHEN YOU NEED IT, WHERE YOU NEED IT

Englert's rollforming machines allow you to create your own seamless roofing panels when and where you need them most – at your construction site. Don't believe the myth that on-site fabrication doesn't match factory quality. Englert's rollforming machines come equipped with chrome-plated forming dies equal to top-of-the-line factory machines. That means you'll be able to fabricate factory-quality panels at a moment's notice.

ENGLERT'S ROLLFORMING MACHINES HELP YOU:

- Save money by lowering shipping costs. *No more shipping "air."*
- Avoid site storage problems. *Now, there is no more need to store premanufactured panels.*
- Save time by eliminating construction delays. *No more worrying about damaged panels.*
- Cut waste in half by laying out only what you want rolled. *No more paying for extra materials.*
- Expand creative boundaries by fabricating extra-long or custom-designed panels in all colors. *No limits on what you can roll.*
