

Re: Manufacturer's Certification Statement for IRS Tax Credit

Englert Inc. is an Energy Star Partner. Englert metal products coated with the following paint colors are specifically and primarily designed to reduce heat gain of a dwelling unit when installed on a dwelling unit and meet or exceed Energy Star program requirements. Thus any metal roofing panel system manufactured using these Englert colors will become an Eligible Building Envelope Component qualified for the credit for nonbusiness energy property under the Section 25C of the Internal Revenue Code:

Englert Galvalume Plus (clear acrylic)
Permacolor 2000 Bone White
Permacolor 2000 Deep Red
Permacolor 2000 Dove Gray
Permacolor 2000 Patina Green
Permacolor 2000 Sandstone
Permacolor 2000 Sea Fog Gray
Permacolor 2000 Sierra Tan
Permametallic 2000 Metallic Copper
Permametallic 2000 Pre-Weathered Galvalume

A taxpayer may claim this credit with respect to the amounts paid for an Eligible Building Component only if the following criteria are satisfied: 1) the component is installed in or on a dwelling unit located in the United States and at the time of installation, the dwelling unit is owned and used by the taxpayer as the taxpayer's principal place of residence; 2) the original use of the component commences with the taxpayer; and 3) the component reasonably can be expected to remain in use for at least five years. The credit applies to property placed in service after December 31, 2005 and before January 1, 2008; the maximum amount of the credit allowable to a taxpayer under Section 25 is \$500 for all taxable years. **This is a summary of the tax credit and it is not intended to be tax advise. We strongly recommend that you consult a tax professional for its applicability to your situation.**

Under the penalties of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts are true, correct and complete.

Ken Krawcheck
Vice President of Manufacturing
