

ENGLERT™ METAL ROOFING

Since its founding in 1966, Englert has evolved into one of the pre-eminent forces in metal roofing. Englert offers architects and builders innovative, and ever more advanced solutions that uniquely combine aesthetics and performance.

Englert is widely recognized as the leader in jobsite rollforming, where materials are custom cut and fit on site, to provide a seamless, high quality product, with far less waste, and at lower costs than pre-formed panels.

Englert Metal Shingles are one of the more exciting innovations in the roofing industry today. They offer a perfect choice for light commercial and residential applications. Finally, an affordable, easily installed metal roof alternative.

FEATURE PROJECT

Cicatelli Residence

JOB PROFILE

Project name:

Cicatelli Residence, single-family home
Stroudsburg, Pennsylvania

Location:

Reroof of existing

Architect:

The Service Team, Leighton, Pennsylvania

General Contractor:

SlateCrest

Materials:

Vermont blue/gray

Color:

This was a 30 year asphalt roof which failed prematurely at only 11 years. The Metal shingles were applied directly over the existing shingle roof after applying 30# felt. Since the metal panels weighed only 64 lbs./sq., tear-off of the asphalt shingles was not required.
