

ENGLERT™ METAL ROOFING

Since its founding in 1966, Englert has evolved into one of the pre-eminent forces in metal roofing. Englert offers architects and builders innovative, and ever more advanced solutions that uniquely combine aesthetics and performance.

Englert is widely recognized as the leader in jobsite rollforming, where materials are custom cut and fit on site, to provide a seamless, high quality product, with far less waste, and at lower costs than pre-formed panels.

Englert Metal Shingles are one of the more exciting innovations in the roofing industry today. They offer a perfect choice for light commercial and residential applications. Finally, an affordable, easily installed metal roof alternative.

FEATURE PROJECT

The Home Depot

JOB PROFILE

Project name: The Home Depot
Location: Old Bridge, New Jersey
Architect: Greenberg Farrow Architecture Engineering Planning
 Somerset, NJ
General Contractor: Milric Construction
Materials: Unirib C36
Color: Safety Orange and Snow Drift White
 All of the metal wall and roof panels on this 134,258 square foot Home Depot have a premium Kynar 500/Hylar 5000 finish on both top and underside. The project, which was completed in April 2001, consists largely of panels painted orange over white, with some rawhide over white panels and white over white panels.
